## STANDARD CONSTRUCTION

### SSD Drain Series

The Ingersoll-Rand System Saver electronic level sensing drain detect and discharges only when condensate is present.

The SSD 7 - 14 have an anodized and dry powder epoxy coated aluminum lid and glass filled nylon,

flame retardant bowl. These units feature a test button, alarm feature and volt free remote alarm connections.

The SSD 21 - 35 have an anodized and dry powder epoxy coated aluminum housing and are also fitted with a test button, alarm feature and volt free remote alarm connections.

The construction of all drain models allows for routine maintenance to be performed without being disconnected from the installation.

Large inlet connections ensure no air locks and easy installation.
